

# AXLE EXTENSION KIT

*Are you ready for more control?*

**FITS ALL 2008 AND NEWER 9000 SERIES TRACK TRACTORS**

The ERA Axle Extension Kit greatly improves turning while pulling under load. It also provides more stability, especially on hills or rolling land with improvements to the tractors center of gravity. This wider stance also decreases berming on headland turns and is ideal for controlled traffic farming. The Kit increases the track stance of your John Deere track tractor by 22" by adding an 11" extension to each end of the axle. This extension increases the totally stance width to 128" instead of the stock 106".

# WHICH TRACTOR WOULD YOU RATHER DRIVE?

106"

128"
